

St Augustine's Catholic Primary School

Head Teacher: Mrs J Foley

We love and learn together by growing
in friendship with Jesus

Wednesday 12th February 2025

Dear Parents,

Science week is fast approaching and this year the theme is '**Change and Adapt**'.

To support this, the Solihull Primary Science Partnership are running a science week project and have invited local primary schools to participate. They are asking children to undertake a science project linked to this year's theme. The project can be presented in any physical form including models, posters and demonstrations.

They are asking schools to judge the best projects from each key stage and select winners who will attend the grand judging final at Tudor Grange Academy Solihull on Wednesday 5th March 2025.

At this event, children from each school will present their project to judges and prizes will be awarded. National Grid are sponsoring the event and providing science based prizes for students to take home.

The categories for entry are:

Key Stage 1

Lower Key Stage 2

Upper Key Stage 2

St Augustines would like to participate in this exciting showcase of science and are therefore setting the **Science project as homework for half term for Year's 1 to 6.**

Please bring in your completed projects for judging on Tuesday 25th February. Make sure you have attached your name and Year group to your project. We will be judging the projects on Wednesday 26th February, so late entries will not be accepted. If your project includes a demonstration, please include a written outline of this.

Finalists will be informed by Friday 28th February. Children who are selected to attend Tudor Grange Academy will walk there with a member of staff on the morning of 5th March and will return to school for lunch. **Please see the flyer on our website which outlines the project.**

During Science week, which is the week commencing March 10th, all children will have an opportunity to share their projects within their Year groups as part of the exciting activities we have planned.

Many thanks,

Miss Hill
(Science lead)
